

The Gap & Our Answer

▲ PROBLEM

Current preparation is unrealistic, expensive, hard to scale, and inconsistent.

- Students and job seekers lack realistic interview pressure.
- Professional coaching is expensive and difficult to scale.
- Traditional mock interviews produce inconsistent feedback.
- Employers spend major time screening baseline candidates.
- Interview performance does not always predict job readiness.
- 9th–10th grade students choose streams or majors without pathway guidance.

MAPS
TO

✓ SOLUTION

HRVERSE turns practice into measured simulation.

- Realistic VR interview scenarios create controlled pressure.
- Users speak naturally with an adaptive voice-to-voice AI interviewer.
- Feedback covers answer quality, speech delivery, confidence, communication, hiring readiness, and overall performance.
- Scalable AI/VR simulation reduces dependence on manual coaching.
- Institutions receive automated feedback and structured reports.
- RIASEC supports early academic and career pathway guidance.
